

# **BUILT FOR WORLD'S BEST HORSES**

## **Product sheet: Horse exerciser 16 meter 4 horses**

Frequent exercise is of capital importance for the condition of every horse. By means of a Q-line® horse exerciser you can provide your horse with the necessary exercise in a safe and controlled environment.

The Q-line® horse exercisers are design and build according to the highest norms and technological standards. The safety of your horse was the prime focus in the Q-line designs.

The exercisers are equipped standard with multiple safety measures like the lightweight horse friendly drive fences. With the Q-line® horse exerciser you can provide your horse with a controlled training. You can choose let your horse sprint or step.

The Q-line® horse exerciser improves your horse's condition in many ways. Maneuverability, endurance and stronger bones are only a few of the traits your horse will be training. The control boxes are fit with diverse options for the time interval and direction reversal. The speeds can be set with the manual timer or digitally.

Every Q-line® fencing is constructed in a way that has the least risk of injuring your horse. The materials used are selected for their long lifespan and smooth finishing.

### **Unique benefits**

#### **Safety:**

The Q-line® horse exercisers are specially designed to be as safe as they can be and are equipped with a slip drive, lightweight driving fences and electrical overburdening settings. All moving parts are protected from contact.

#### **Durability:**

By making use of high quality industrial material we can ensure a long lifespan. The technologically advanced design makes the Q-line® horse exerciser rotate smooth- and quietly. The minimal friction put less strain on the driving engine so that little energy is used.

#### **External characteristics:**

In the designing Q-line® has strived to create a compact and minimalistic appearance. The propulsion section of the exerciser is finished with plastic so that it looks stylish.

#### **Maintenance:**

The Q-line® exerciser is a solid construction and requires little maintenance. The technologically advanced design and choice in materials minimize corrosion so that maintenance is barely needed.

#### **Quality mark:**

All Q-Line® Horse exercisers conform to the machine code 2006/42/EG and are fit with the CE quality mark. The Q-line® solaris are certifiably approved by KEMA according to the NEN 3140 and ARBO directive en hereby conform to all European safety demands.

### **Walk control box WCB 1.1**

Speed:	Adjustable with speedometer
Max speed:	Standard 16 km/h
Direction:	Automatic left right
Time:	Adjustable from 1 to 60 minutes
IP rating:	IP 65
Power:	230 Volt 50 Hz
Power socket:	1.5 meters including connection plug
Exerciser electric:	4 pin plug IP65 connection
Emergency break:	By yellow/red switch
Cabinet material:	Steel with industrial powder coating
Dimensions:	250x200x200
Optional:	Mounting brackets On/off switch for shock device
