SAFETY WALL

WALKER

Mesh push panel, with impact-resistant plastic protective tube for panel walkers. Provides not only optimal safety but also durability. This mesh construction offers a secure and controlled solution for various training purposes.

Durable:

The robust construction of this mesh panel emphasizes its resistance to wear. With carefully selected materials, the product offers durability that withstands intensive use and various conditions. The mesh panel maintains its structural integrity, making it a reliable and sustainable choice for prolonged use in different training environments.

Practical Use:

Whether it's daily training sessions or targeted exercises, the functional properties of the mesh panel make it a useful addition to any training arena. The design not only simplifies the training processes for human handlers but also provides an enriching and comfortable experience for the horses.

Weather Resistance:

The mesh panel maintains its durability and has a long lifespan by resisting various weather conditions, ranging from intense sunlight to precipitation and temperature fluctuations. This weather resistance ensures a reliable and long-lasting product.

Features

Protective Edge:

The protective edge is a impact-resistant plastic protective tube precisely attached around the mesh panel. This impact-resistant plastic protective tube serves as an effective barrier, significantly reducing the risk of injury during training sessions. The protective edge provides a high level of protection and safety for the horses.

Maintenance:

The mesh panels are very solidly constructed and require very little maintenance. Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, minimizing maintenance.

Weather-Resistant and Low Maintenance:

Both the PVC flaps and the mesh are treated to withstand various weather conditions. The plastic protection around the mesh panel minimizes maintenance, ensuring that the training environment is always in optimal condition.

Dimensions:

With a size of 2x1.5 meter and a mesh size of 5x5 cm, this mesh panel offers a balanced dimension. This optimizes the flexibility of the training, making it suitable for various exercises and disciplines.

Specifications

Width	2 meter
Basic material	Galvanized mesh panel 2x1.5 meter
Fixings	Not included
Thickness	25 mm
Weight	13,7 kg
Height	1,5 meter
Colour	Gray
Supplied as standard	Protective edge all around
Transport weight	35,7 kg
Transport size	1,5 x 0,8 x 2 mtr
