For Q-Line push fences

Push panel connector pair / Article no. 23-3-20-00140

Push panel Connector Pair

This pair includes two forks, two threaded rods, an eye nut, and a shackle, along with the necessary nuts and washers. Specially designed for hanging aluminum gate posts. Easy to install and durable, this set is essential for a safe and efficient attachment of gates in your mill environment. Using this hanging method ensures that the electric shock is directly transmitted to the gates.

- ✓ Easy installation
- ✓ Durable
- ✓ Weather-resistant
- ✓ Reliable

Features

Easy Installation:

The set is designed with ease of use in mind, allowing for quick and hassle-free installation.

Specific Design for Aluminum panel Posts:

This gate connector pair is precisely designed to perform optimally when hanging aluminum gate posts, making it an ideal choice for this type of gate.

Secure Attachment of Gate:

The combination of forks, threaded rods, eye nut, and shackle ensures a secure and stable attachment of the gate, which is essential for a reliable mill. The set comes with two sturdy forks, providing reliable support and suspension of the aluminum gate posts. Two threaded rods are included in the set, offering a complete mounting solution without the need for additional parts.
