Features

Safety:

The control box is splash-proof and equipped with a lockable main switch.

Appearance:

The control box has a power cord with plug and a cable of approx. 10 m including plug for the solarium.

Maintenance:

Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, which means that hardly any maintenance is required.

Quality mark:

All control boxes comply with the machine directive 2006 / 42EG and are provided with the CE mark as standard. The boxes are also tested ex works according to the NEN 3140 and OSH directive and therefore meet all European safety requirements.

Control:

The IR lamps are switched with the mechanical timer switch.

The fans can be switched off or on and there is an “automatic” position. In this position, the fans do not switch on until the temperature in the solarium is 30°C.
