SOLARIUM | IRRIGATION | TREADMILL | SAFETY WALL | WALKER

Purchasing a coin-operated machine for a horse solarium can have various benefits, both for you as the owner and for the users of the solarium, namely your horses. Here are some reasons why it may be worth considering a coin-operated machine:

Cost Recovery: A coin-operated machine allows you to have the owners of the horses cover the costs of solarium usage. This can help offset the initial investment and ongoing expenses of the solarium.

Regulated Usage: By using a coin-operated machine, you can better manage and regulate the use of the solarium. This prevents excessive usage and ensures that the solarium is available when needed.

Maintenance and Operational Costs: Using a coin-operated machine can assist in covering the maintenance and operational costs of the solarium, such as electricity, bulb replacement, and any necessary repairs.

Incentive for Maintenance: Horse owners often take better care of facilities they pay for. Having a coin-operated machine can encourage owners to keep the solarium in good condition and ensure proper maintenance.

Responsibility for Usage: A coin-operated machine can help place the responsibility for the correct usage of the solarium on the horse owners. They are likely to pay more attention to usage guidelines when they are paying for it.

Additional Revenue Source: If the solarium is located in an environment where multiple horse owners have access to it, installing a coin-operated machine can create an additional revenue source for you as the owner.

Flexible Pricing Structures: With a coin-operated machine, you can set various rates depending on the duration of usage or other factors. This allows you to offer flexible pricing structures that cater to the needs of different customers.

It's important to strike a balance between cost coverage and providing an affordable and attractive service for horse owners. Implementing a coin-operated machine can be a good way to achieve this balance while ensuring a sustainable and well-maintained horse solarium.

- Efficiency and Convenience
- Accurate
- Complete with cables
- Safe
- Various currencies
- Compact design

Q-LINE.COM

Features

Safety:
The coin device is splash-proof and can be equipped with various switch buttons.

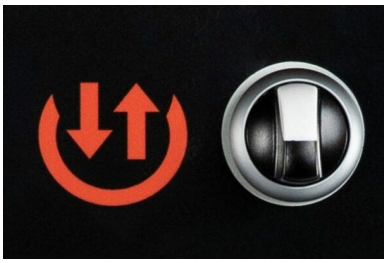

Appearance:
The coin device has a power cord with plug and a cable of approx. 10 m including plug for the solarium.

Maintenance:
Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, which means that hardly any maintenance is required.

Quality mark:
All coin devices comply with the machine directive 2006 / 42EG and are provided with the CE mark as standard. The cabinets are also tested ex works according to the NEN 3140 and ARBO directive and therefore meet all European safety requirements.

Service:
With the internal switch, the desired burning duration per coin can be set from 1 to 10 minutes. The machine automatically counts the number of coins inserted.

Specifications

Drive system	25 cm
Width	20 cm
Thickness	15 cm
Drive system	7 Kg
Basic material	ABS cabinet
Colour	RAL 7035
Secure	Lock with key
Fixings	Included
Cable length	10 meter with plugr
Power supply	L+N+PE 230 Volt
Switching capacity	3600 Watt
Fuse with	1x 16A
IP rating	44
Included	wall brackets
Suspension	Wall mount
Quality mark	CE / NEN 3140 / OSH
Suplied as standard	2 keys
Time	1- 10 minutes per coin including addition function.
Transport weight	8 kg
Transport size	40x30x30x cm
Not included	Token
Suited for	Token 27 mmgs
