## Sublime Horse Exerciser

The Sublime Horse Exerciser from Q-Line is designed for safe, controlled and well-structured movement. This system offers a practical and spacious solution for daily use and integrates easily into a wide range of training routines. With its solid construction and intuitive operation, horses can be guided calmly and clearly during each exercise session.

## Technology and Safety Combined

The Sublime Horse Exerciser is equipped with:

- Extra-strong support arms for optimal stability
- Central direct-drive motor with safety coupling and protective cover
- Safety Flex push gates: lightweight, impact-resistant and horse-friendly
- Walk/trot control box with two-position switch for separate or combined movement

This combination makes the exerciser suitable for calm, structured activity across various training situations.

## Benefits of the Sublime Horse Exerciser

- Varied movement: supports rhythm, routine and clarity during exercise
- Safe, defined space: clear structure for both horse and handler
- Efficient operation: possibility to work multiple horses at once
- Quiet environment: ideal for controlled activity during buildup and daily routines
- Long service life: robust construction with low-maintenance components

## Features

### Safety:

The Sublime horse exerciser is designed to train your horses as safely as possible and include equipped with a direct drive with a safety break coupling, Safety Flex "lightweight impact-resistant horse-friendly" push panels and electronic overload adjustment. All dangerous moving parts are protected against contact. The drift fences are suspended in specially developed brackets that ensure that a horse cannot get stuck on a drift fence.

### Durability:

By using high-quality industrial parts, we can ensure a very long service life guarantee. Due to a technologically advanced design, the exerciser turns almost silently and very lightly, this makes the Q-line® horse exercisers particularly energy efficient. The Sublime has a cover on the rotating part to protect it against the elements.

### External characteristics:

The designs of the horse exerciser aim for a compact and minimalist appearance. The drive section of the exerciser is protected against contact. The drift fences are suspended at a height of 2 meters and made of an aluminum cross bar containing 10 x 1.6 meter long impact-resistant plastic tubes wrapped with a stainless steel spring for electric shock conduction.

### Maintenance:

The Q-line® exercisers are very solidly constructed and require very little maintenance. Through the technologically advanced design and the materials used, there is virtually no wear or corrosion, so maintenance is minimized.

### Quality marks:

All horse exercisers comply with the machine directive 2006 / 42EG and are provided with the correct quality marks as standard the Q-line® horse exercisers are certified according to the NEN 3140 and OSH directive guidelines and meet all European safety requirements.

### Control:

The walk-trot box supplied as standard fulfills the need to train the horses daily.

The waterproof box is equipped with:

- 1 main switch
- 2 position switch to choose between walking and trotting.
- 2 potentiometers for the speeds to be set
- 3 position switch to set the turning time - 5/10/15 minutes
- 1 switch to guide the horses in and out of the exerciser
- 2 position switch to let the horses walk only left or only right
- \* optional electric current control switch

## Specifications

<b>Diameter</b>	15 meter
<b>nr of horses</b>	4
<b>Height</b>	2,3 meter
<b>Width</b>	Walk way 2,5 meter
<b>Speed</b>	16 kmh Adjustable
<b>Time</b>	Adjustable 5/10/15 minutes
<b>Drive system</b>	Direct drive
<b>Secure</b>	Break coupler
<b>Electronic brake</b>	yes, adjustable
<b>Included</b>	Shock preparation
<b>Power supply</b>	230 Volt, 50 Hz
<b>Power usage</b>	1000 Watt
<b>Fuse with</b>	16A Type F
<b>Ampere</b>	10A
<b>IP rating</b>	54
<b>Quality mark</b>	CE / NEN3140 / OHS
<b>Drift Fence</b>	Safety Flex, Aluminium pole with flexible safety rods
<b>Suplied as standard</b>	Control box WCB 2.1
<b>Cable length</b>	Motor cable 14 meter
<b>Basic material</b>	Galvanized steel NEN-EN-ISO 1461-99.
<b>Fixings</b>	Included
<b>Transport size</b>	1 pallet 300cm x 80cm x 150cm
<b>Transport weight</b>	529 KG
