Mercurr Combo Livery Basic Deal

The Mercurr Combo Livery Basic Deal delivers professional muscle care in a simple, reliable system.
This set combines the powerful Mercurr 230 Solarium with a Euro coin unit, ideal for livery and sport yards with multiple users.
Low-maintenance, energy-efficient, and fully plug-and-play – professional quality without unnecessary complexity.

- Chamfered neck part
- Rounded edges
- Good heat partition
- Suitable for washroom
- Automatic Circulation air blower
- CE Marking

Mercurr Horse Solarium

The Mercurr 230 Solarium is made from impact-resistant, heat-resistant plastic and equipped with 22 infrared lamps and 4 fans.
The infrared rays enhance blood flow, support muscle recovery, and help prevent stiffness and injuries.
This keeps the horse relaxed, supple, and ready for work – ideal for warm-up, cooldown, or daily care.
The energy-efficient housing minimizes heat loss and reuses internal warmth, ensuring effective and economical operation even under heavy use.

Euro Coin Unit

The integrated coin unit operates with €1 coins, ensuring fair and transparent use among multiple yard users.
It is fully plug-and-play and directly connectable to the solarium – no additional wiring or settings required.
A practical, low-cost solution for yards seeking a simple and transparent usage system without administration.

Reliable and User-Friendly

The Mercurr Combo Livery Basic Deal combines simplicity with professional performance.
A durable system that promotes circulation, relaxes muscles, and speeds recovery – every single day.

Q-LINE

SOLARIUM IRRIGATION TREADMILL SAFETY WALL WALKER

Features

Safety:
The Q-Line® solariums are finished with rounded sides and corners, eliminating the risk of injury to your horse. The lamps are positioned higher than the surfaces and cannot fall out of the sockets, minimizing the chance of contact with the warm IR lamps.

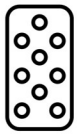

Durability:
Q-Line® solariums consume up to 40% less energy than competing solariums, making them more environmentally friendly. The heat-resistant plastic is resistant to corrosion, ensuring minimal heat loss and high efficiency. The infrared lamps in the Q-Line® solariums are designed to withstand prolonged intense heat, unlike other lamps, and can burn for up to 5000 hours.

Appearance:
Q-Line® solariums have a stylish appearance and a sleek finish. All solariums are plug-and-play and can be easily installed. The fans automatically turn on at an internal temperature of 30 degrees Celsius, preventing cold air from blowing over your horse.

Maintenance:
The solariums require very little maintenance. Due to the technologically advanced design and materials used, there is virtually no wear or corrosion, reducing the need for maintenance.

Certification:
All solariums comply with the machinery directive 2006/42/EC and are standardly equipped with the CE mark. Additionally, Q-Line® solariums are factory-inspected according to NEN 3140 and ARBO guidelines, meeting all European safety requirements.
