Mercurr Combo Livery Yard Sublime Deal

The Mercurr Combo Livery Sublime Deal is the complete solution for professional livery and sport yards.
This set combines the powerful Mercurr 230 Solarium, the electric lift unit, and a mobile payment system into one user-friendly and professional setup.
Ideal for yards where multiple riders share the same facility – reliable, efficient, and low-maintenance.

Mercurr Horse Solarium

The Mercurr 230 Solarium is built from impact-resistant, heat-resistant plastic and equipped with 22 infrared lamps and 4 fans.
The infrared radiation stimulates blood circulation, helps remove toxins, and reduces the risk of stiffness and injuries.
The result: a supple, relaxed horse and faster recovery – perfect after training or for daily grooming.
Its energy-efficient design minimizes heat loss and reuses internal warmth from the fans, making it both economical and effective for everyday stable use.

Electric Lift Unit

The quiet, reliable lift unit allows easy height adjustment of the solarium, ideal for horses of varying wither heights or when additional headroom is required.
The robust construction ensures safety and durability, even under daily professional use.

Mobile Payment System

The mobile payment system makes operation transparent and easy to manage.
Payments are made securely via smartphone – no coins or tokens required.
Perfect for livery yards with multiple users. Fully plug-and-play, remotely configurable, and designed for maximum control and convenience.

Complete Care Solution

With the Mercurr Combo Livery Sublime Deal, you choose a stylish, professional, and future-proof system.
It combines comfort, usability, and efficiency – everything needed for optimal muscle care, relaxation, and recovery of your horse.

- Chamfered neck part
- Rounded edges
- Good heat partition
- Suitable for washroom
- Automatic Circulation air blower
- CE Marking

Q-LINE

SOLARIUM IRRIGATION TREADMILL SAFETY WALL WALKER

Features

Safety:
The Q-Line® solariums are finished with rounded sides and corners, eliminating the risk of injury to your horse. The lamps are positioned higher than the surfaces and cannot fall out of the sockets, minimizing the chance of contact with the warm IR lamps.

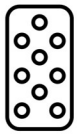

Durability:
Q-Line® solariums consume up to 40% less energy than competing solariums, making them more environmentally friendly. The heat-resistant plastic is resistant to corrosion, ensuring minimal heat loss and high efficiency. The infrared lamps in the Q-Line® solariums are designed to withstand prolonged intense heat, unlike other lamps, and can burn for up to 5000 hours.

Appearance:
Q-Line® solariums have a stylish appearance and a sleek finish. All solariums are plug-and-play and can be easily installed. The fans automatically turn on at an internal temperature of 30 degrees Celsius, preventing cold air from blowing over your horse.

Maintenance:
The solariums require very little maintenance. Due to the technologically advanced design and materials used, there is virtually no wear or corrosion, reducing the need for maintenance.

Certification:
All solariums comply with the machinery directive 2006/42/EC and are standardly equipped with the CE mark. Additionally, Q-Line® solariums are factory-inspected according to NEN 3140 and ARBO guidelines, meeting all European safety requirements.
