

TREADMILL

Basic Horse walker fencing

Fence 18,6 mtr

Basic XL fencing 18,6 mtr / Article no. 12-5-65-00018

Fence suitable for the Basic XL walker with a diameter of 18 meters.

You can train your horses with confidence in a Q-line® walker surrounded by a Q-line fence. The materials used have been selected for durability and finish. Thanks to the flexible structure of the fence, you can put together your own fence.

The basic fence comes with square sawn posts, a wooden rail with rounded edges and 2 layers of band that are secured with the secure clips. The rest of the fence can be filled in with planks or additional layers of durable band. The Fences are supplied with mounting material, a steel gate and hinges and locks. The fences are supplied in Northern European pine and spruce as standard.

- Flexible construction
- Smooth finish
- Horse friendly

TREADMILL

Features

Safety:

The Q-line® fences are designed to let your horses walk as safely as possible while training in the walker. All wooden parts are rounded and mounted in such a way that this results in the least risk of injury in the event of an emergency.

Durability:

By using wood preservation we can guarantee a very long life. The wood is impregnated under pressure, which ensures that it does not need any further finishing.

Appearance:

The wood can be preserved in various ways. The wood can undergoes a preservation. This can be done in three ways, only preservation, preservation with a water-repellent treatment or preservation with a brown color. The posts are made sustainable in order to have a longer lifespan and better properties against attack by, for example, fungi.

Maintenance:

All fences are maintenance-free due to the sustainability of the materials.

Quality mark:

All wood has the required quality marks. The wood quality can be demonstrated with a KOMO product certificate.
