Safety Wall Door and Gate

The Q-Line **Safety Wall door and gate** offer an innovative and safe solution for accessing your riding arena. Designed with attention to detail and functionality, our doors and gates integrate seamlessly into the arena kickboard wall without compromising safety or aesthetics.

✓ Light to open

✓ Seamless finish

✓ Easy assembly

Invisible finish and seamless integration

The Safety Wall door and gate are designed to be virtually invisible when closed, ensuring a smooth and uniform appearance of the Safety Wall. Thanks to the use of high-quality materials and an innovative construction, there are no sharp edges, significantly enhancing safety for both horse and rider.

Flexible configurations

The Safety Wall gate can be configured with up to three panels, providing maximum flexibility for a wide range of applications. Thanks to the specially developed Q-Line hinges, the gate opens horizontally even when installed in an angled wall. This makes the system user-friendly and efficient for both indoor and outdoor arenas.

The Safety Wall hinge is designed with ease of installation in mind. The angle is adjustable on both sides, and the door height can be easily adjusted. This allows for fast and precise installation. The robust construction ensures long-term stability and maximum safety during daily intensive use.

Durable and low-maintenance

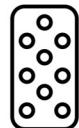

Like the Safety Wall panels, the doors and gates are made from durable materials that withstand heavy loads and weather conditions. This makes them suitable for intensive use in both indoor and outdoor riding arenas. In addition, they are low-maintenance thanks to their dirt-repellent surface finish.

Why choose Q-Line doors and gates?

- **Safety:** No sharp edges and a seamless finish for optimal protection
- **Functionality:** Innovative hinge system for smooth and easy operation
- **Durability:** Resistant to intensive use and varying weather conditions
- **Flexibility:** Suitable for various configurations and applications

SAFETY WALL

WALKER

Features

Safety:

By opening the gate horizontally, entrapment by a falling gate is excluded.

Durability:

Due to the robustness of the hinges and the frames, the gates are indestructible.

Appearance:

Invisible hinge concealed in the wall.

Maintenance:

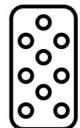

The gate hinge does not require lubrication and is maintenance-free.

Easy to assemble:

Because the gate opens horizontally, mounting is very simple and the hinge can easily be mounted against a flat wall.

Specifications

Suited for	3 panels
Basic material	Galvanized steel
Width	284 cm
Height	143 cm
Thickness	3 cm
Weight	71 kg
Included	Horizontal hinge
Colour	Zinc
Suspension	Supplied mounting plate
Fixings	Including
Supplied as standard	Shutter
Transport weight	86 kg
Transport size	300 x 80 x 141 cm
