SOLARIUM | IRRIGATION | TREADMILL | SAFETY WALL | WALKER

Construction Details:
The construction is made of galvanized steel beams, divided into sections. All steel parts are galvanized according to the highest standards (NEN-EN-ISO 1461-99) and have been carefully calculated according to the applicable building regulations.

Roofing:
The roofing consists of steel profile sheets with the renowned 32mm dam wall profile. Manufactured from durable steel and equipped with a high-quality coating, these sheets are tailor-made for your cover. You have the freedom to choose a color that suits your stable, with a reassuring 30-year warranty on the coating, supported by the manufacturer of the coated steel, Arcelor.

Anti-Condensation Felt:
Our roof sheets come standard with anti-condensation felt on the underside. This advanced felt absorbs moisture (up to 600 gr/m2) and minimizes condensation between periods of temperature fluctuations, maintaining a healthy climate for your horses.

Steel Profile Purlins:
The shelters are equipped with sturdy steel profile purlins. This versatile profile serves as a roof purlin, wall purlin, or floor beam and is reinforced by the inwardly curved extra lip. With a standard zinc layer of Z275 (275 g/m²) or ZMA140 (140 g/m²), these purlins are resistant to the test of time.

Snow Load:
Our covers are designed to withstand a snow load , with the responsibility for the snow load lying with the customer. Our commitment to sustainability and safety is our utmost priority.

Choose Sustainability, Choose Q-line
In conclusion, we not only provide protection for your horses but also invest in the long-term functionality of your stable. Our high-quality construction, durable coating, and thoughtful details make Q-line covers the ideal choice for any stable. Contact us today and discover how we can elevate your stable to a higher standard.

- Galvanized steel construction
- Calculated according to the standard NEN-EN 1990:2002
- Sufficient crossing
- Fully covered lunging arena
- Reinforced footplates

Features

Safety:
The Q-line® covers are designed to train your horses as safely as possible and to protect them against the weather. By finishing everything on the inside smoothly, optimum safety is guaranteed.

Durability:
By using high-quality industrial parts, we can guarantee a very long lifespan. All constructions are therefore standard hot-dip galvanized.

External characteristics:
In the designs of the covers, the aim has been to achieve a compact and minimalist appearance.
The lunge cover has a completely closed roof so that the horses are protected against the weather during training.

Maintenance:
Q-line® covers have a very solid construction and require very little maintenance. Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, which minimizes maintenance.

Quality mark:
All covers comply with local building regulations and are standard equipped with the CE mark. The Q-line® covers are also calculated by a recognized agency, so that you are assured of an approved construction.

Configuration & options

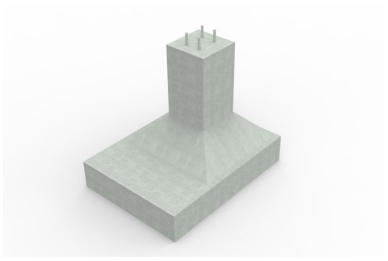

Fencing for a 20-meter roof

Lunging fence for a 20-meter roof

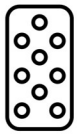

Rain gutter 15 sections

Concrete Foot
