Proper lubrication of the rotating parts is essential to reduce failure and increase exerciser life.

An automatic lubrication system intended for automating and centralizing grease lubrication is a solution. The system consists of a hose with couplings and a grease cartridge.

The grease cartridge works without a battery and is adjustable between 1 and 12 months. Depending on the use of the exerciser, you set the period.

This lubrication system is ideal for all ground-mounted exercisers.

Image not found **Replaceable grease cartridges**

Image not found **Low installation costs**

Image not found **Compact and reliable**

Image not found **12 months maintenance free**

Image not found **Temperature range -15° C to +60°C**

Image not found **Multifunctional, indoor and outdoor**

Image not found **No chemical waste**

Features

Safety:

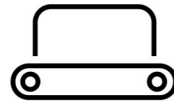

By lubricating the ring bearing of the exerciser in time, problems due to wear are less likely to arise.

Durability:

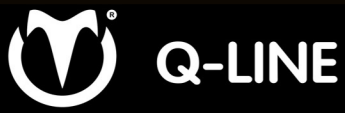

Lubrication of rotating parts ensures a longer service life.

Appearance:

All lubricants are Multi purpose grease.

Maintenance:

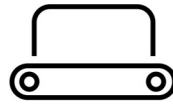

Maintenance is conservation, this also applies to the exerciser.

Specifications

Connection	6mm
Drive system	Gas
Basic material	Plastic
Required working pressure	5 bar
Fixings	Mounting bracket
Suited for	Slewing ring
Weight	300 gr
Included	30 cm hose
IP rating	68
Other	125CC
Time	1 to 12 months
Transport weight	1 kg
Transport size	25 x 10 x 10 cm
