Roller Treadmill for Horses

The Q-Line Roller Treadmill offers an innovative approach to controlled movement for horses. By using micro-rollers instead of a traditional flat belt, the horse experiences smooth and even motion with minimal friction. This creates a comfortable and well-organised exercise environment that fits naturally into daily stable routines.

The treadmill is developed with years of experience in stable technology and practical horse equipment. Its design focuses on safety, durability and ease of use, making the Roller Treadmill a valuable addition to professional stables and modern training facilities.

Unique movement technology

The micro-roller system supports a natural and even walking motion. With minimal friction, the running surface remains stable in temperature and the system stays efficient and low-maintenance. This is particularly convenient during longer sessions and for horses that are sensitive to heat development in the hooves.

Key features of the Q-Line Roller Treadmill

1. Durable design with reduced friction

The micro-roller system minimises wear and makes the treadmill suitable for intensive daily use.

2. Full safety and control

Equipped with an advanced control system that includes:

- emergency stop
- start/stop brake electronics
- drum drive with mechanical brake

This ensures you always maintain clear control over each session.

3. Safe access with anti-slip ramps

The entry ramps feature anti-slip mats, allowing horses to step on and off smoothly and with confidence.

4. Optimal visibility and protection

Features

Safety:

The Q-line® treadmills can only move in height when the motor is on. This prevents the horse from walking uncontrolled and thus falling. If a malfunction occurs in the treadmill, the height adjustment is automatically reset and returns to the horizontal position.

Durability:

By using high-quality industrial parts, we can guarantee a very long lifespan. Thanks to a technologically advanced design, the belt glides almost silently and very lightly, making the Q-line® treadmills particularly energy-efficient.

Appearance:

The treadmill trainer is a well thought-out technological solution and is characterized by the flexible bottom and solid construction. In which a running quality is obtained that is comparable to a natural soil.

Lifespan:

Q-line® treadmills are made of high-quality material. The drum motors in the treadmills are water and dust proof and are therefore considerably less sensitive to malfunctions. Thanks to a completely galvanized construction, the Q-line® treadmills can also be used outdoors.

Maintenance:

The treadmills require very little maintenance. Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, which minimizes maintenance.

Quality mark:

All treadmills comply with the machine directive 2006 / 42EG and are provided with the CE mark as standard. The Q-line® mills are also certified ex works according to the NEN 3140 and ARBO directive and therefore meet all European safety requirements.

Specifications

Drive system	Drum motor
nr of horses	1
Suited for	Horses up to 800 kg
Secure	Infra red fence / Mechanical break
Speed	10 km / h manually with potentiometer
Other	Side wall: polycarbonate
Supplied as standard	Ramp at the front and rear
Optional	Height adjustment
Basic material	Steel
Colour	Zinc or powdercoating RAL xxxx
Length	Walkway 342 cm / total 650 cm
Height	214 cm
Width	135 cm
Thickness	31 cm
IP rating	55
Quality mark	CE
Power cord	230/240V L-N-PE
Power supply	230/240V 50/60 Hz
Power usage	4KVA
Ampere	21
Fuse with	25A
Transport weight	1750 kg
Transport size	380 x 140 x 220 cm
