Color Therapy for Horses: Balance, Recovery & Energy Through Light

Colors influence the physical and energetic well-being of horses. With targeted color therapy, tension is reduced, natural healing processes are stimulated, and the horse becomes more balanced — both physically and emotionally.

Effects of Color on the Equine Body

- **Blue** – Calms the nervous system and promotes deep relaxation. Supports metabolism, digestion, and helps relieve various types of pain.
- **Green** – Restores calm and satisfaction. Aids in detoxification and relaxes internal organs.
- **Yellow** – Energizes like sunlight. Boosts mood and assists the body in eliminating toxins and negative energy.
- **Red** – Stimulates heart, lungs, and muscles. Enhances blood circulation, supports the immune system, and has a diuretic effect.

- ✓ Stylish look
- ✓ Lightweight design
- ✓ Flexible shape setting
- ✓ Higher heat output
- ✓ Impact resistant plastic
- ✓ Spray water proof
- ✓ CE marking

Maxuss Thera Basic: Professional Equine Solarium with Color Light Therapy

The **Maxuss Thera Basic**, a flagship model from Q-Line, delivers precise light therapy tailored to the equine anatomy. Its advanced design follows the contours of the horse, using a combination of **Infrared (IR)**, **Ultraviolet (UV)** and **RGB color light** to treat muscles and energy systems effectively.

Key Features

- Durable dual-colored, heat-resistant plastic body
- Three independently adjustable segments for targeted light coverage
- Manually adjustable front and rear sections
- Height adjustable via included lift and control unit
- Follows the horse's body shape for optimal light distribution

Features

Safety:

The Q-line® solaria have been finished with round sides and corners which excludes the chance your horse will get injured. The lamps are placed higher than the holders so that the horse can never come in to direct contact with the lamps.

Durability:

The Q-line® solaria use up to 40% less energy than competitive products and are remarkably environmentally friendly. The heat resistant plastic is insensitive to corrosion and ensure minimal heat loss and a high efficiency. The infrared lights in the Q-line® solaria are designed to be especially heat resistant and can endure great temperatures for extensive periods of time. These lamps can burn up to 5000 hours.

External characteristics:

The Q-line® solaria have a stylish appearance and smooth finishing. All solaria can be used directly and require no further assembly.

The fans automatically switch on at an internal temperature of 30 degrees C so that no cold air is blown over your horse. 9 built-in RGB spots are programmable and distributed over the entire bottom surface provide sufficient therapeutic light during washing and cleaning. The RGB lights have a positive, beneficial effect on the energy system and ensure that your horse is more in harmony.

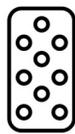

The biological effect of the sun beams can be compared to a sports activity, improve the recovery capacity after heavy physical activity or illness and ensure reactivation of active substances, increase or regulation of blood calcium levels.

Maintenance:

The Q-line® solaria require little to no maintenance. With our technologically advanced design and the choice of materials we have ensured that corrosion is kept to a minimum.

Quality mark:

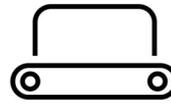

All Q-line® solaria conform to the machine code 2006/42/EG and are fit with the CE norm. The Q-line® solaria are certified according to the NEN 3140 and Labor and health directive en hereby conform to all European safety demands

Configuration & options

Solarium Installation

“I’ve been using the Q-line solarium for several years now, and I’m genuinely super happy with it! I have the MaXuSS model — the version that allows you to set the lights in a specific colour, so naturally mine is pink! In addition to the heat lamps, there are also UV lamps, which really benefit my horses, especially during the winter months. The service has always been perfect — it’s already been relocated twice. The technicians are incredibly friendly and the end result is great — it’s installed super neatly. In short: top-notch service and a top-quality solarium!”

— Britt Dekker

Specifications

Length	243 cm
Width	130 cm
Height	80 cm
Weight	80 Kg
Basic material	Heat resistant plastic
Colour	Black /Silver Grey
Number of IR lamps	12x IR 100W, 10x IR 150W
Number of UV lamps	2x 300W
Number of LED lamps	9 programmable RGB LED lights
Air blower	6x 90m3, automatic at 30grC
Power supply	230V L+N+PE 16A
Power usage	3530 Watt
Fuse with	C 16 A
Suspension	Lift unit, max lift height 1,5 mtr
Suplied as standard	Control box
Other	Shape only 1 time adjustable
Quality mark	CE / NEN 3140 / OHS
IP rating	54
Transport weight	137 Kg
Transport size	155x85x200 cm
