Boost recovery & performance with the compact Vitafloor?VME

The Vitafloor VME is a clinically supported vibration plate for horses. With its compact design, this system is perfect for rehabilitation, training,
and daily well-being.

- Made in NL
- Mobile
- Vertical vibration
- Noiseless
- Easy operation

? Proven results

? Up to +20% bone density and reduced stress hormones after just 10 minutes a day.
? Improved muscle development and flexibility within 60 days of use.
? Based on studies by UC Davis, Uppsala, and other veterinary centers.

?? What makes the VME unique?

? Vertical Whole Body Vibration with deep-reaching effect up to the withers.
? Compact and mobile: easy to place in any stable or trailer.
? Energy-efficient and safe: only 230 V / 0.5 kW, CE-certified and IP-65 waterproof.
? Plug-and-play: no technical installation required, low maintenance.
? Suitable for daily use in both sport and rehabilitation settings.

? Real-life applications

? Injury recovery: stimulates blood flow and accelerates healing.
? Warm-up: faster muscle relaxation and readiness for work.
? Well-being: reduces stress and supports hoof growth.
?? Box rest: maintains muscle activity without strain.

? Why choose Vitafloor VME?

- Clinically proven results for bone strength, muscle recovery, and wellness.
- Safer than horizontal vibration plates – no joint strain.
- Compact, mobile, and fully expandable with accessories.
- Backed by veterinarians, trainers, and rehab professionals worldwide.
- Comes complete with control box and easy-to-follow manual.

Features

The Scientifically Proven Benefits of Vitafloor: More Than Just a Vibration Plate

Revolutionary Bone Regeneration and Enhanced Blood Circulation
Research from the Veterinary University in Davis, California, reveals that Vitafloor plays a key role in bone regeneration, not only in the legs but also in the ribs of horses. This groundbreaking system also enhances blood circulation throughout the entire body, essential for the overall health of the horse.

Tangible Vibrations for Profound Effects
Using Vitafloor, you can feel the vibrations up to the horse's shoulders, demonstrating the profound impact of this therapy. This non-invasive vibration training is the only treatment with documented positive effects on conditions such as osteoporosis and Silicosis.

Significant Improvements in Bone Density and Healing
Studies show that Vitafloor can increase bone density by as much as 20%. This is important not only for horses but also a relevant finding from human studies. Additionally, Vitafloor helps prevent and treat colic, a common problem in horses.

Accelerated Healing and Improved Hoof Health
Vitafloor offers significant benefits in treating soft tissue injuries, painful joints, laminitis, and sesamoid bone conditions. Tendon injuries typically heal in half the usual time, with a significantly better quality of the healed tissue. It also stimulates healthy and rapid hoof growth – crucial for horses with hoof problems.

Stress Reduction and Energy Consumption
Vitafloor lowers cortisol levels, contributing to the horse's relaxation. It consumes energy and burns fat, contributing to the overall fitness and health. The vibration training also increases testosterone production.

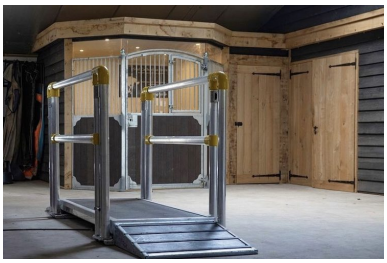

Muscle Growth and Flexibility
Preliminary veterinary research indicates that Vitafloor contributes to the growth of back muscles and increased muscle flexibility. A significant increase in muscle strength is observed after just 10 minutes on Vitafloor for a period of 10 days.

Improved Performance and Faster Recovery
Horses trained on Vitafloor show faster acceleration from a standstill and improved quality of gaits. Elasticity and flexibility increase. Additionally, Vitafloor accelerates the regeneration process after heavy exertion, allowing horses to recover more quickly.

Configuration & options

“"VDL stud farm is responsible for more than 50 breeding stallions worldwide. Since 1972 our warmbloods and their offspring have been put to the test at the highest levels, and our horses have been taking part in the Olympics since 1996. In addition, our stallions are being successfully used by other studbooks. In our continued quest to improve our quality, we started using a Vitafloor in the beginning of 2022 in our European certified breeding station in Bears, The Netherlands. Our company slogan is “Quality wins the battle” and the use of the Vitafloor fits within this very well”.”

“VERY SATISFIED WITH THE SERVICE "We have been using the Vitafloor for years. After using it, we notice a clear difference in our horses; they feel very relaxed both mentally and physically. We are also very satisfied with the service that Vitafloor provides us!"”

— Sjef Janssen | Anky Education Center | Bondscoach dressuurteam België

“For more than 8 years I’ve been using the Vitafloor every single day. Honestly, I couldn’t imagine being without it anymore, because both before and after training I notice a huge difference when my horses have been on the vibration plate. Installation was super easy, and all my horses absolutely love it. It’s fantastic for the muscles and blood circulation. If one of my horses ever has a swollen leg, after just 10 minutes on the Vitafloor it’s already much slimmer. I also stand on it every day while grooming, so I get lucky too and feel the benefits myself. Honestly, I wish every stable had a Vitafloor! Britt Dekker”

““I had the privilege of using a Vitafloor while stabled in Belgium in preparation for the 2014 World Equestrian Games. I was hesitant about my horse being nervous but he very quickly accepted the sessions and was soon leading himself onto the floor! Vitafloor helps keep my horses comfortable in ways that I can’t. The vibration penetrates much deeper than any icing technology or massage and treats the whole body in every session. In addition to the physical benefits, the horses love it!””

— Laura Graves, American Dressage athlete.

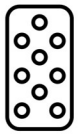

““"Competition horses in top form" "The Vitafloor is a valuable addition to our competition horses, it really helps to keep them in top shape, clean and healthy!""”

— Steffen Peters S. Peters Dressage, San Diego CA, USA

Specifications

Length	2000 mm
Width	900 mm
Height	170 mm
Weight	105 Kg
Basic material	Aluminium
Power supply	230 V / 50 Hz
Power usage	1 KW
Fuse with	16 A
Time	Not adjustable
IP rating	IP 65
Cable length	5 meter
Quality mark	CE
Power cord	230V + RA
Fixings	Included
Transport size	2100 x 1000 x 500 mm
Transport weight	140 Kg
Included	Basic control cabinet
