The practical choice for safe and effective equine vibration therapy

For those looking for a safe and effective vibration plate for horses, the Vitafloor stable unit is the ideal choice. This model is designed with maximum freedom of movement in mind, allowing the horse to relax naturally during vibration therapy. Thanks to its smart design, constant supervision is not required – the horse experiences the benefits of Whole Body Vibration completely independently.

Free movement, safe training

The stable unit is often built into an existing or new stable and can be surrounded by low walls. This way, the horse does not need to be tied up, which promotes a natural resting posture and prevents stress. The optional airlift function – where one side of the floor is periodically raised – provides additional muscle stimulation. Internal studies show that this feature can improve muscle development by up to 30% compared to standard vibration plates.

A practical vibration plate for daily use

The Vitafloor stable unit is custom-made within the maximum dimensions of 2x3 or 4x3 meters, so it fits perfectly in your stable. Operation is simple: place the horse on the floor, start the program, and let the technology do the rest. With the automatic shut-off function, the system is not only easy to use but also safe. One unit can treat up to 20 horses per day – without requiring intensive labor.

Safe, maintenance-free, and proven effective

Users appreciate the Vitafloor not only for its results but also for its low maintenance and solid construction. This vibration plate is designed for years of reliable use. Whether it's for muscle building, rehabilitation, or general wellness – the Vitafloor stable unit is a smart investment in your horse's health.

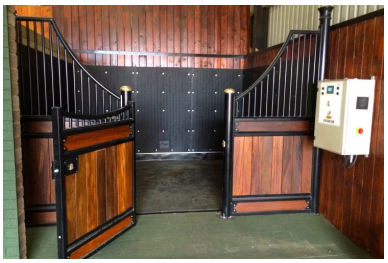

- Improved blood flow
- Faster healing of injuries
- muscle strength increase
- Improved bone regeneration

What's the difference between a Vitafloor with and without airlift?

Both systems provide powerful full-body vibrations that support recovery, blood circulation, and muscle development. But there is one key difference:

Features

1. **Bone Regeneration**: Scans from the Veterinary University in Davis, California, show that Vitafloor promotes bone regeneration in both the legs and ribs of horses.
2. **Improved Blood Circulation**: Vitafloor enhances blood flow throughout the entire body of the horse.
3. **Tangible Vibrations**: When you place your hands on the horse, you can feel the vibrations up to the shoulders.
4. **Effective Against Osteoporosis and Silicosis**: Vitafloor is the only non-invasive treatment with a documented positive effect on osteoporosis and Silicosis.
5. **Improvement in Bone Density**: Studies indicate an improvement in bone density of up to 20% (based on a human study).
6. **Prevention and Treatment of Colic**: Vitafloor aids in preventing and treating colic in horses.
7. **Treatment for Soft Tissue and Joint Injuries**: Effective in treating soft tissue injuries, painful joints, laminitis, and sesamoid bone conditions.
8. **Faster Healing of Tendon Injuries**: Tendon injuries generally heal in half the normal time with better quality of healed tissue.
9. **Stimulates Hoof Growth**: Promotes healthy and rapid growth of hooves, especially important for horses with hoof problems.
10. **Lowers Cortisol Levels**: Helps in lowering cortisol levels, contributing to the relaxation of the horse.
11. **Energy Consumption and Fat Burning**: Vibration training consumes energy and aids in burning fat.
12. **Increases Testosterone Production**: The training increases testosterone production.
13. **Muscle Growth and Flexibility**: Preliminary veterinary research indicates that Vitafloor contributes to the growth of back muscles and increased muscle flexibility.
14. **Increase in Muscle Strength**: Significant increase in muscle strength after just 10 minutes on the Vitafloor for a period of 10 days.
15. **Improved Performance and Recovery**: Horses trained on the Vitafloor can accelerate faster from a standstill and show improved quality of gaits, elasticity, and flexibility. Additionally, Vitafloor accelerates the regeneration process after heavy exertion.

““I had the privilege of using a Vitafloor while stabled in Belgium in preparation for the 2014 World Equestrian Games. I was hesitant about my horse being nervous but he very quickly accepted the sessions and was soon leading himself onto the floor! Vitafloor helps keep my horses comfortable in ways that I can’t. The vibration penetrates much deeper than any icing technology or massage and treats the whole body in every session. In addition to the physical benefits, the horses love it!””

— Laura Graves, American Dressage athlete.

“VERY SATISFIED WITH THE SERVICE "We have been using the Vitafloor for years. After using it, we notice a clear difference in our horses; they feel very relaxed both mentally and physically. We are also very satisfied with the service that Vitafloor provides us!""

— Sjef Janssen | Anky Education Center | Bondscoach dressuurteam België

“For more than 8 years I’ve been using the Vitafloor every single day. Honestly, I couldn’t imagine being without it anymore, because both before and after training I notice a huge difference when my horses have been on the vibration plate. Installation was super easy, and all my horses absolutely love it. It’s fantastic for the muscles and blood circulation. If one of my horses ever has a swollen leg, after just 10 minutes on the Vitafloor it’s already much slimmer. I also stand on it every day while grooming, so I get lucky too and feel the benefits myself. Honestly, I wish every stable had a Vitafloor! Britt Dekker”

“"VDL stud farm is responsible for more than 50 breeding stallions worldwide. Since 1972 our warmbloods and their offspring have been put to the test at the highest levels, and our horses have been taking part in the Olympics since 1996. In addition, our stallions are being successfully used by other studbooks. In our continued quest to improve our quality, we started using a Vitafloor in the beginning of 2022 in our European certified breeding station in Bears, The Netherlands. Our company slogan is “Quality wins the battle” and the use of the Vitafloor fits within this very well”.”

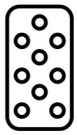

— VDL Stud - Quality Always Wins

“"Competition horses in top form" "The Vitafloor is a valuable addition to our competition horses, it really helps to keep them in top shape, clean and healthy!"”

— Steffen Peters S. Peters Dressage, San Diego CA, USA
