In the dynamic world of horse training, the visible strip for push panels is a revolutionary addition. This black PVC flap offers a subtle yet effective solution to limit visibility between horses. Especially in situations with stallions, it is a valuable tool to prevent unwanted interactions and maintain a serene training environment.

Controlled Interactions
Between Horses

The black PVC visible strip acts as a visual barrier, reducing horses' awareness of each other. This is particularly useful when training stallions, where reduced visibility can help minimize excitement and distraction, keeping the focus on training.

Prevention of Unwanted Behavior
By reducing visual contact between horses, the visible strip helps trainers prevent unwanted behaviors such as aggression or distraction. This contributes to a safer training environment for both horses and trainers.

Privacy and Concentration
Just like humans, horses appreciate their privacy. The visible strip provides a sense of isolation, allowing horses to concentrate more on their training task without being distracted by the presence of other horses.

Easy Installation and Maintenance
The black PVC visible strip is easy to install and requires minimal maintenance. The durable material withstands the challenges of a training environment, making it a practical and effective addition to any horse exerciser.

Conclusion
A Calm Atmosphere for Effective Training The visible strip for push panels proves to be a valuable tool for trainers aiming for a calm, controlled training atmosphere. By reducing visual contact between horses, this black PVC flap offers a solution for managing interactions and maintaining focused, undisturbed training. It is a small adjustment with significant benefits for successful horse training.

Features

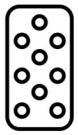

Visual Separation
The black PVC visible strip provides an effective visual barrier between horses in a horse exerciser, reducing visibility from one horse to another. This contributes to controlling interactions and prevents unwanted behavior, especially in stallions or other horses sensitive to visual stimuli.

Focus on Training
By reducing visual contact between horses, the visible strip creates an environment where horses can better concentrate on their training tasks. This promotes an effective and undisturbed training experience, keeping the horse's attention on the trainer and the exercises.

Easy Installation and Durability
The visible strip is designed for easy installation on push panels in horse exercisers and requires minimal maintenance. Made of durable black PVC, the material withstands the conditions in a training environment, ensuring long-lasting and reliable operation.

Promotion of Safety
This innovative addition promotes safety by preventing unwanted behavior between horses. It minimizes risks of aggression and distraction, creating a safer training environment for both horses and trainers.
