The Sedelogic Reverse Orthopad is specifically developed for horses that require more lift or support at the front. This saddle pad gradually becomes thinner from the front to the back. It has a thickness of 23 mm at the front and 12 mm at the back of the saddle pad. It has the same properties as the standard Sedelogic saddle pad.

A saddle pad from Sedelogic is an important accessory that offers numerous benefits for both your horse and yourself during riding. Here are some reasons why we highly recommend the use of a saddle pad:

Comfort and protection:

A saddle pad provides extra comfort and cushioning between the saddle and your horse's back. It helps reduce pressure points and absorbs shocks during riding, making your horse more comfortable and less prone to injuries.

Correct fit:

A saddle pad can help accommodate minor imperfections in the saddle's fit. It lifts or fills the saddle slightly, distributing the pressure more evenly over your horse's back. This is especially useful if your horse has a slightly irregular back shape or if the saddle doesn't fit perfectly.

Sweat absorption:

Your horse can sweat significantly during riding. A high-quality saddle pad can absorb and wick away sweat, keeping your horse's back drier. This helps prevent skin irritations and chafing, which are essential for maintaining a healthy skin.

Hygiene:

Using a saddle pad also facilitates the cleaning and maintenance of your saddle. It protects the saddle from direct contact with your horse's sweat and oils, prolonging its lifespan and reducing dirt buildup.

Moreover, the saddle pad is easy to remove and wash, allowing you to always have a clean and fresh underpad.

Overall, using a saddle pad offers numerous benefits for the well-being and comfort of your horse, as well as the durability of your saddle. It's important to choose a high-quality saddle pad that suits your specific needs and matches the type of saddle you use.

The Sedelogic saddle pad is the first saddle pad developed for use under the horse's saddle, incorporating extensive pressure measurements. A team of veterinarians, technicians, a scientist from an academic hospital, and a renowned saddle maker has utilized aerospace techniques to develop this unique and performance-enhancing saddle pad. This saddle pad is suitable for all disciplines within equestrian sports and is suitable for both elite athletes and recreational riders.

- ✓ Perfect pressure distribution
- ✓ Super shock absorption
- ✓ Good ventilation
- ✓ Lightweight

Features

Discover the ultimate comfort and unrivaled performance of our revolutionary saddle pad. With a range of unique features, this pad provides a riding experience that you and your horse have never experienced before:

- **Excellent shock absorption:** Thanks to advanced technologies, our saddle pad offers unparalleled shock absorption. It absorbs every impact during riding, significantly reducing pressure on your horse's back. Enjoy a smoother ride and protect your horse's health.
- **Breathable structure:** Our saddle pad features a breathable structure that allows for optimal air circulation. This promotes ventilation and prevents heat and moisture buildup under the saddle. Your horse stays cooler and more comfortable, even during intense training sessions.
- **Perfect pressure distribution:** With an advanced design, our saddle pad ensures perfect pressure distribution over your horse's back. It minimizes pressure points and prevents discomfort while riding. This allows your horse to move freely and perform at its best.
- **Efficient heat dissipation:** Our saddle pad is designed to efficiently dissipate heat. The advanced material regulates temperature and prevents excessive heat buildup under the saddle. This keeps your horse cool and protected from overheating, even during long rides.
- **No pressure points:** Thanks to carefully engineered construction, our saddle pad eliminates pressure points completely. It evenly distributes the pressure across the entire surface, giving your horse full freedom of movement and unhindered performance. Prevent irritations and discomfort for a happy and healthy horse.

Experience the ultimate combination of comfort, protection, and performance with our innovative saddle pad. No more compromises when it comes to riding comfort and well-being. Choose a saddle pad that meets your highest demands and give your horse the ride it deserves.

WALKER

“Every horse is different, so every horse has his own pad for the best performances. That’s only possible with Sedelogic. I train Wotan for example with the Orthopad so the saddle gets slightly lifted in the back. For him, it’s the perfect solution to give his best in every competition.”

— Remco Bouwens

“Very grateful for this!!! We received it today and tried it out immediately, Top! We now have three different types and can use all three, We've exchanged our gel pads for the Sedelogic pads because the horses move superbly under them.”

““I have been using the Sedelogic pads for a number of years and am incredibly happy with them. From day one they have held their shape and are as good today as they were the first day I used them. They are thin enough to not affect the fit of my saddles, but have enough cushion to keep my horses backs happy.””

— Robert Mendoza- Grand Prix Show Jumper

““I’ve been riding dressage and XC schooling in the Sedelogic Pad with my horses. My feelings are that they are very light, easily worn, an exceptional fit, and as far as I can tell very effective! I’m lucky because my saddles all fit very well. The pad does not interfere with saddle fit and I think very probably that the Sedelogic pad adds to their effectiveness, especially competing in a sport where being perfect all the time is probably not possible. These pads are going to add to those tools that will make yours and your horses life easier and better”.”

— Jonty Evans
