The Sedelogic Western saddle pad is specifically designed for use under a Western saddle. It utilizes the unique material properties of the Sedelogic line, as described in the standard Sedelogic pads. This saddle pad is mostly thicker (3 layers - 23 mm).

A saddle pad from Sedelogic is an essential accessory that offers numerous benefits for both your horse and yourself during riding. Here are some reasons why we highly recommend using a saddle pad:

- ✓ Perfect pressure distribution
- ✓ Super shock absorption
- ✓ Good ventilation
- ✓ Lightweight

Comfort and protection: A saddle pad provides extra comfort and cushioning between the saddle and your horse's back. It reduces pressure points and absorbs shocks during riding, making your horse feel more comfortable and less prone to injuries.

Proper fit: A saddle pad can compensate for minor irregularities in the saddle fit. It lifts or fills the saddle slightly, distributing the pressure more evenly over your horse's back. This is especially useful if your horse has a slightly different back shape or if the saddle doesn't fit perfectly.

Sweat absorption: Your horse can sweat quite a bit during riding. A high-quality saddle pad can absorb and wick away sweat, keeping your horse's back drier. This helps prevent skin irritations and rubs, which are essential for maintaining a healthy skin.

Hygiene: Using a saddle pad also facilitates the cleaning and maintenance of your saddle. It protects the saddle from direct contact with your horse's sweat and oils, prolonging its lifespan and keeping it cleaner for longer. Additionally, the saddle pad is easy to remove and wash, ensuring you always have a clean and fresh pad.

In summary, using a saddle pad offers many benefits for the well-being and comfort of your horse, as well as the durability of your saddle. It's important to choose a high-quality saddle pad that suits your specific needs and matches the type of saddle you use.

The Sedelogic saddle pad is the first saddle pad developed for use under the horse saddle with extensive pressure measurements. A team consisting of veterinarians, technicians, a scientist from an academic hospital, and a renowned saddler has developed this unique saddle pad using aerospace techniques, enhancing performance. This saddle pad is suitable for all disciplines within equestrian sports and is suitable for both elite athletes and recreational riders.

Features

Discover the ultimate comfort and unrivaled performance of our revolutionary saddle pad. With a range of unique features, this pad provides a riding experience that you and your horse have never experienced before:

- Excellent shock absorption: Thanks to advanced technologies, our saddle pad offers unparalleled shock absorption. It absorbs every impact during riding, significantly reducing pressure on your horse's back. Enjoy a smoother ride and protect your horse's health.
- Breathable structure: Our saddle pad features a breathable structure that allows for optimal air circulation. This promotes ventilation and prevents heat and moisture buildup under the saddle. Your horse stays cooler and more comfortable, even during intense training sessions.
- Perfect pressure distribution: With an advanced design, our saddle pad ensures perfect pressure distribution over your horse's back. It minimizes pressure points and prevents discomfort while riding. This allows your horse to move freely and perform at its best.
- Efficient heat dissipation: Our saddle pad is designed to efficiently dissipate heat. The advanced material regulates temperature and prevents excessive heat buildup under the saddle. This keeps your horse cool and protected from overheating, even during long rides.
- No pressure points: Thanks to carefully engineered construction, our saddle pad eliminates pressure points completely. It evenly distributes the pressure across the entire surface, giving your horse full freedom of movement and unhindered performance. Prevent irritations and discomfort for a happy and healthy horse.

Experience the ultimate combination of comfort, protection, and performance with our innovative saddle pad. No more compromises when it comes to riding comfort and well-being. Choose a saddle pad that meets your highest demands and give your horse the ride it deserves.

““I have been using the Sedelogic pads for a number of years and am incredibly happy with them. From day one they have held their shape and are as good today as they were the first day I used them. They are thin enough to not affect the fit of my saddles, but have enough cushion to keep my horses backs happy.””

— Robert Mendoza- Grand Prix Show Jumper
