Elevating Equine Training with Cutting-Edge Technology

In the realm of equine care and training, the AquaTrainer Basic emerges as a game-changer. Designed to alleviate stress while promoting healing and fitness, this aqua treadmill represents a significant advancement in horse rehabilitation and conditioning. This article explores the myriad of features and benefits offered by the AquaTrainer Basic, showcasing why it's a must-have for equine professionals.

Understanding the Role of Aqua Treadmills in Equine Health

Aqua treadmills have revolutionized the approach to equine health and fitness. The AquaTrainer Basic exemplifies this by allowing horses to exercise essential muscles, tendons, and ligaments used in regular track workouts, but without the damaging impact. This low-impact, high-resistance training is ideal for rehabilitation, conditioning, and maintaining peak physical fitness in horses.

The Ultimate Uphill Workout Solution

Transform your uphill training experience with the AquaTrainer, innovatively designed for adjustable incline levels ranging from 0-10%. This state-of-the-art AquaTrainer escalates the intensity of your workouts, amplifying the activation of your forward-moving muscles by as much as 27%. It's not just about muscle engagement; the AquaTrainer also focuses on strengthening your top line. As you train, you'll notice significant improvements in the robustness of your back and neck muscles. The AquaTrainer is more than a training accessory; it's a comprehensive tool that ensures a balanced, effective, and enhanced training session, tailor-made for uphill challenges.

Key Features of the AquaTrainer Basic

The AquaTrainer Basic is packed with features designed to enhance the equine training experience:

Stainless Steel Construction: Ensures durability and longevity.

Touchscreen Control with 200 Programs: Offers easy programmability and varied workout options.

Efficient Cleaning and Maintenance: Large cleaning hatches and easy-release doors streamline the cleaning process.

Rapid Water Filling and Draining: Achieves working level in just 3 minutes, minimizing downtime.

Floor Ramps: To use the Aquatrainer on the floor

Advanced Technology Integration

At the heart of the AquaTrainer Basic is the AQI-3800 Water Trainer, which includes a 600L tank and an efficient pumpstation. The system's 950 liters per minute capacity and two 200/micron pre-filters, coupled with an electrical panel, ensure a smooth and clean operation. The dual pump system, capable of pumping 250 gallons per minute, reflects the machine's robust performance.

Prioritizing Safety and Cleanliness

Safety and cleanliness are paramount in the AquaTrainer Basic. It incorporates two 200-micron basket filters to remove debris and ensures water sanitation. Comes with two diapers. The added feature of remote control via smartphone enhances operational safety and convenience.

Installation and Customer Requirements

Installing the AquaTrainer Basic requires some preparations from the customer, including a drain in the floor for effective cleaning and electrical outlets for power connections. This initial setup is crucial for optimal operation and long-term benefits of the equipment.

The AquaTrainer Basic is not just a treadmill; it's a comprehensive

- ✓ Low-Impact Exercise
- ✓ Advanced Technology Integration
- ✓ Superior Design and Durability
- ✓ Efficient Water Management and Filtration
- ✓ Customization and Accessibility
- ✓ Programmable Workouts
- ✓ Stainless Steel Construction
- ✓ Rapid Water Filling and Draining
- ✓ Remote Control Access
- ✓ User-Friendly Maintenance

Features

Low-Impact Exercise:

Offers a safe, low-impact environment ideal for the rehabilitation and training of horses, reducing the risk of stress-related injuries.

Advanced Technology Integration:

Equipped with a touchscreen interface featuring over 200 programmable workouts, allowing for a high degree of customization to suit individual horse needs.

Superior Design and Durability:

Constructed with high-quality stainless steel and safety glass, ensuring long-term durability and resistance to corrosion.

Efficient Water Management and Filtration:

Includes efficient water management systems for quick filling and draining, coupled with advanced filtration systems to maintain clean and safe water conditions.

Customization and Accessibility:

Provides customizable settings and user-friendly features, often including remote control capabilities via smartphone for convenient operation.

Stress Relief and Fitness Enhancement:

Designed to relieve stress and promote healing and fitness in horses, making it a powerful tool for both rehabilitation and conditioning.

Muscle, Tendon, and Ligament Exercise:

Enables horses to exercise the same muscle groups, tendons, and ligaments used during track workouts, but without the harsh impact of the track's surface.

Unique Cleanability:

Features like large cleaning hatches and easy-release doors simplify maintenance and cleaning processes.

Rapid Water Cycling:

Capable of very quick water inlet and outlet, which is efficient for different therapy and training sessions.

Safety and Sanitation Measures:

Often includes additional safety and sanitation features, such as filters and diapers, to ensure the health and wellbeing of the horses.

Specifications

Connection	400V 3F+N+E 50/60Hz
Fuse with	32A
Ampere	22,7A
Power usage	15,7 kW
Basic material	Stainless Steel
Secure	IR sensor
Length	Inner 380 cm / Outer 492 cm
Width	Inner 100 cm / Outer 188 cm
Height	Inner 154 cm / Outer 192 cm
Weight	1780 Kg
nr of horses	1
Speed	10 km/h
Suited for	Uphill 10%
Suplied as standard	Pump station, 600-liter tank, smartphone control, 2 diapers.
Optional	Backwash tank for saltwater, safety bumper
Other	Ramp for front and rear
