

RGB LED therapy set

RGB lighting instead of white LED

9 RGB LED / Article no. 21-3-00-00120

Colors influence the physical condition of your horse. They have a positive, beneficial effect on the energy system and ensure that your horse is more in harmony.

Blue has a calming effect and leads to deep relaxation. This color has a positive effect on it multiple types of pain and has a harmonizing effect on the metabolism and bowel activity.

Green calms and ensures peace and satisfaction. It relaxes the organs and stimulates the body's detoxification.

Yellow is the color of the sun, makes you happy and gives new energy. This bright color helps to remove waste products and negative particles from the body.

Red is the color of the heart, lungs and muscles. It stimulates, activates and revitalizes. Red works water repellent and strengthens the immune system
