WALKER

Enhance Your Horse Training with Our Advanced Horse Walker

Discover the technological superiority of our horse walker - an essential innovation for improving horse conditioning and training efficiency. Boasting robust, extra-thick support arms and a stylishly designed central drive unit with a safety coupling and protective cover, our horse walker offers the perfect blend of durability and style.

Safety-Oriented Design:

Equipped with our unique Safety Flex push panels - lightweight, impact-resistant, and horse-friendly, ensuring maximum safety during training.

Advanced Walking/Trotting Mechanism:

Ensures controlled training, with the flexibility to choose between walking or a combination of walking and trotting thanks to the 2-mode switch.

Benefits of Our Horse Walker:

Condition Improvement:

Strengthen your horse's muscles and improve overall fitness through varied movements like walking, trotting, and galloping.

Injury Prevention:

Reduce the risk of injuries by providing a controlled training environment, ideal for uneven terrains and other high-risk situations.

Increased Training Capacity:

Enable your horse to train more in less time, contributing to enhanced performance and endurance.

Rehabilitation Friendly:

An ideal solution for horses in recovery, offering a stress-free environment to gradually return to normal training routines.

Efficiently Train Multiple Horses: T

rain multiple horses simultaneously in an efficient and controlled manner, saving time for other essential tasks.

Conclusion:

Our horse walker is a game-changer in the horse training industry. It offers a safe, efficient, and effective way to improve the condition, performance, and well-being of your horses. Choose innovation and quality - choose our advanced horse walker.

- ✓ Including shock preparation
- ✓ Electronic braking system
- ✓ Direct drive
- ✓ Safety coupling
- ✓ Whisper silent during operation
- ✓ Safety Flex push panel
- ✓ Push panels with safety release
- ✓ Low maintenance
- ✓ CE mark
- ✓ Extra heavy duty

Features

Safety:

The Sublime horse exerciser is designed to train your horses as safely as possible and include equipped with a direct drive with a safety break coupling, Safety Flex "lightweight impact-resistant horse-friendly" push panels and electronic overload adjustment. All dangerous moving parts are protected against contact. The drift fences are suspended in specially developed brackets that ensure that a horse cannot get stuck on a drift fence.

Durability:

By using high-quality industrial parts, we can ensure a very long service life guarantee. Due to a technologically advanced design, the exerciser turns almost silently and very lightly, this makes the Q-line® horse exercisers particularly energy efficient. The Sublime has a cover on the rotating part to protect it against the elements.

External characteristics:

The designs of the horse exerciser aim for a compact and minimalist appearance. The drive section of the exerciser is protected against contact. The drift fences are suspended at a height of 2 meters and made of an aluminum cross bar containing 10 x 1.6 meter long impact-resistant plastic tubes wrapped with a stainless steel spring for electric shock conduction.

Maintenance:

The Q-line® exercisers are very solidly constructed and require very little maintenance. Through the technologically advanced design and the materials used, there is virtually no wear or corrosion, so maintenance is minimized.

Quality marks:

All horse exercisers comply with the machine directive 2006 / 42EG and are provided with the correct quality marks as standard the Q-line® horse exercisers are certified according to the NEN 3140 and OSH directive guidelines and meet all European safety requirements.

Control:

The walk-trot box supplied as standard fulfills the need to train the horses daily.

The waterproof box is equipped with:

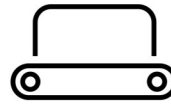

- 1 main switch
- 2 position switch to choose between walking and trotting.
- 2 potentiometers for the speeds to be set
- 3 position switch to set the turning time - 5/10/15 minutes
- 1 switch to guide the horses in and out of the exerciser
- 2 position switch to let the horses walk only left or only right
- * optional electric current control switch

Specifications

Diameter	16 meter
nr of horses	6
Height	2,3 meter
Width	Walk way 2,5 meter
Speed	16 kmh Adjustable
Time	Adjustable 5/10/15 minutes
Drive system	Direct drive
Secure	Break coupler
Electronic brake	yes, adjustable
Included	Shock preparation
Power supply	230 Volt, 50 Hz
Power usage	1000 Watt
Fuse with	16A
Ampere	10A
IP rating	54
Quality mark	CE / NEN3140 / OHS
Drift Fence	Safety Flex, Aluminium pole with flexible safety rods
Suplied as standard	Control box WCB 2.1
Cable length	Motor cable 14 meter
Basic material	Galvanized steel NEN-EN-ISO 1461-99.
Fixings	Included
Transport size	1 pallet 300cm x 80cm x 150cm
Transport weight	681 KG
