

Mounting aid

The gentle way into the saddle

Mounting aid / Article no. 630-5-10-00001

Mounty has developed an automatic mounting aid. This is a world first - one from which both horse and rider benefit in equal measure.

Mounting a horse in the usual way places the animal under considerable nervous and physical strain. No wonder, because a considerable stress is placed on the horse's back as its spine is pulled to the side. In the past, repeated efforts have been made to remedy this problem, but no solution has ever proved entirely satisfactory.

Now, however, Mounty has developed an automatic mounting aid. This is a world first - one from which both horse and rider benefit in equal measure. The Mounting Aid relieves the strain on the horse's back, prevents the saddle from being pulled askew, and spares the animal's nerves. It also makes mounting much easier for the rider - and it folds away automatically after it has been used. Professional riders more or less always use a mounting aid, for it is quite simply a part of good horsemanship.

- ✓ Relieves the strain on the horse's back
- ✓ Prevents saddles from being pulled askew
- ✓ Folds away gently and silently

Features

- Relieves the strain on the horse's back
- Prevents saddles from being pulled askew
- Folds away gently and silently
- Ideal for sensitive horses
- Generously sized step-up board facilitates mounting
- Height of board freely adjustable
- Easy to install and use
- Fitted flush with any kick board and can also be fastened to floors
- No wearing parts, no maintenance, no power requirement
- Tested and recommended by the Deutsche Akademie des Pferdes (FN)

Standard options

Adjustable Ground Bracket

Wall bracket

“A very great success with the mounting aid. Our disabled people appreciate the mounting aid because it gives them a very special sense of security. The mounting aid provides considerable relief for the horses, but also for people with disabilities here in the riding school. The mounting aid offers these people a sense of security.”

— Martina Regenberg, instructor at a riding school with people with disabilities.

Specifications

Length	100 cm
Height	47 cm
Thickness	16 cm
Weight	24 kg
Basic material	Powder coated steel
Fixings	Included
Quality mark	CE
Not included	Mounting aid brackets
Transport size	110 x 50x 16 cm
Transport weight	25 kg
