

## Horse exerciser irrigation

### No dust on the track

Track irrigation Sublime / Article no. 23-3-20-00010

The hoof path irrigation keeps the walkway in the walker moist so that no dust is raised when the horses walk in the walker. Irrigation also ensures a more stable soil.

The high-quality bearing swivel under the walker is made to rotate constantly, unlike cheap "garden hose coupling solutions"

The sprinkler system is equipped with an automatic draining system which ensures that the water runs out of the pipe after every spraying so that it cannot freeze during periods of frost.

The spray tube is horse-proof and cannot become clogged.

- ✓ No dust
- ✓ Stable riding surface
- ✓ Reliable

## Features

- The sublime irrigation is suitable for the Sublime and USD exercisers
- The system will be located in the middle under the engine, so there must be a free passage in the middle
- For other brands, you may have to adjust something to get it right.

## Specifications

<b>Suited for</b>	Q-Line walker Sublime / USD
<b>Connection</b>	1/2" inner thread
<b>Required liters</b>	150 l/h
<b>Required working pressure</b>	2 bar
