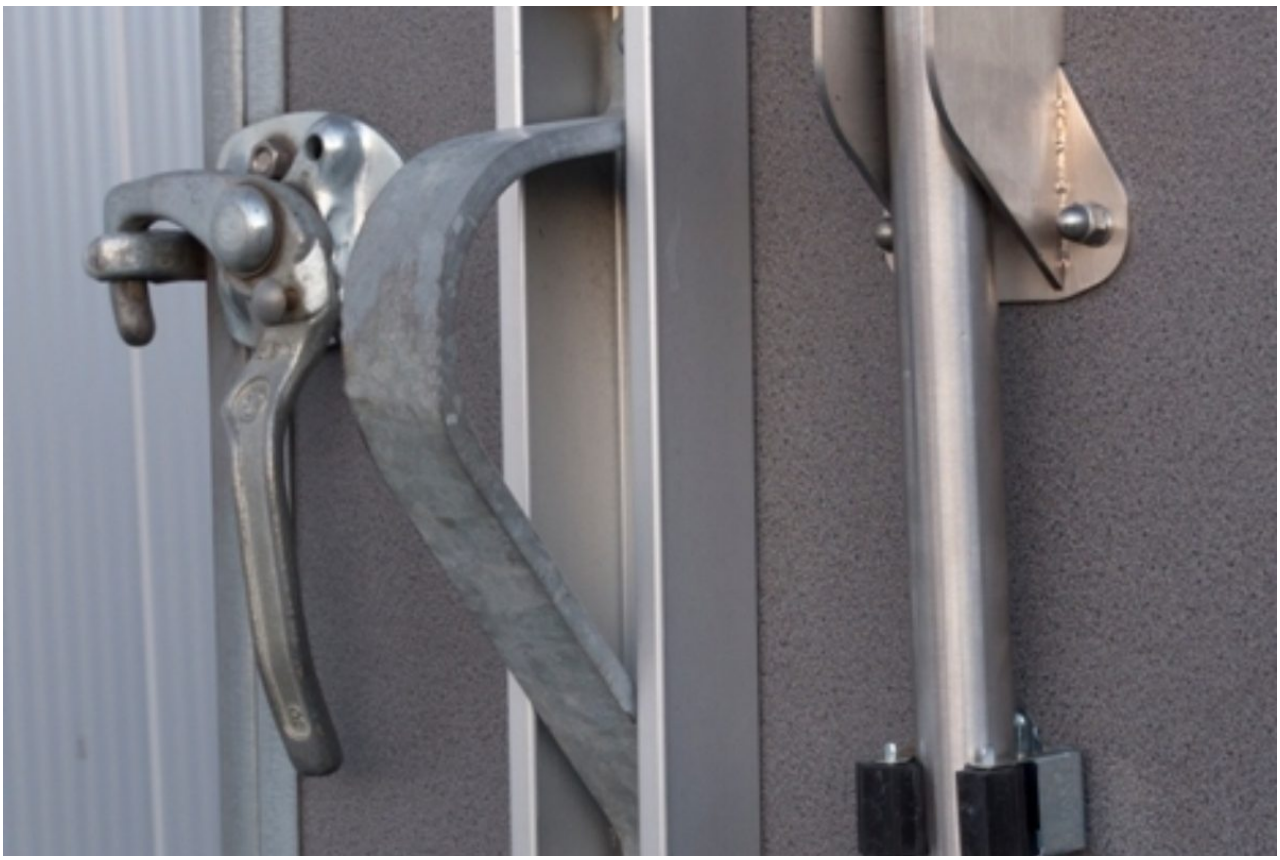
SOLARIUM IRRIGATION TREADMILL SAFETY WALL WALKER

# Step-Up

## The mobile mounting aid for trailers

Step-Up / Article no. 620-5-10-00001



The Mounty Step-Up for the horse trailer is simple and practical. Mounting the horse is quick and easy thanks to the two supports on the trailer, which allows the ramp, if necessary, to be positioned in a horizontal position. The relatively large size of the ramp provides the greatest of flexibility for you and your horse. The Mounty Step-Up is ideal for competitions and rides out in the countryside. It relieves the horse's back of strain and spares its nerves. It prevents saddles from being pulled askew.

- Relieves the strain on the horse's back
- Height of board freely adjustable
- Easy to install and use
