A strong, uninhibited muscle structure is the key to a supple back!

Optimize the time spent on cleaning by relaxing the horse's back right in the stable in a simple and comfortable manner. No hassle when mounting – experience an already relaxed and active horseback during the relaxation phase. Our innovative Warm-Up, based on proven classical massage techniques, provides targeted relief, starting at the withers and back muscles.

Beginning with a soothing stroking massage for acclimatization, followed by a relaxation phase and then a powerful tapping and vibrating massage. This profound massage promotes blood circulation, increases oxygen supply, and eliminates metabolic waste. The rhythmic relaxation and contraction of the back muscles stimulate circulation, essential for muscle recovery and growth.

Our Warm-Up is not only effective for daily use but also valuable support after riding, especially recommended after injuries or training breaks. With three selectable strengths, it offers a customized, controlled massage experience.

Moreover, our Warm-Up requires no special maintenance. The durable nylon material makes it easy to clean with water and a brush. Discover the benefits of Warm-Up for the overall health and performance of your horse, and invest in the ultimate relaxation solution.

- ✓ Innovative Technology
- ✓ Targeted Relief
- ✓ Deep Tissue Massage
- ✓ Rhythmic Relaxation

Features

Innovative Technology:

The Warm-Up utilizes innovative technology based on proven classical massage techniques to effortlessly and comfortably relax the horse's back.

Targeted Relief:

The massage commences with a soothing stroking massage, targeting the withers and back muscles, providing the horse with immediate targeted relief.

Deep Tissue Massage:

The subsequent phase involves a powerful tapping and vibrating massage that penetrates deep into the muscles, promoting blood circulation, increasing oxygen supply, and simultaneously eliminating metabolic waste.

Rhythmic Relaxation and Contraction:

The rhythmic pattern of relaxing and contracting the back muscles stimulates circulation, crucial for promoting muscle recovery and growth.

Daily Use and Post-Ride Support:

The Warm-Up is not only effective for daily use but also serves as valuable support after riding, especially recommended after injuries or training breaks.

Customized Massage Experience:

With three selectable strengths, the Warm-Up offers a tailored and controlled massage experience, adaptable to the horse's specific needs.

No Special Maintenance Required:

The Warm-Up requires no special maintenance, ensuring user-friendliness. The durable nylon material allows for easy cleaning with water and a brush.

Overall Health and Performance Benefits:

Explore the extensive benefits of the Warm-Up for the overall health and performance of the horse, making it an investment in the ultimate relaxation solution.

“For the past few weeks, before every training session my show jumping horses undergo, I use the warm-up massage roller. I place the pad 20 minutes before I start riding. The back is gently loosened with various massage settings. I notice that the horses become calm from the massage, and there is a significant difference in their performance while riding! Some young horses used to find mounting a bit daunting, but this has greatly improved with the use of the pad. Even horses that struggle to use their back properly become more supple while riding and respond more easily to the hand and leg aids. With my sport horses, I also use the pad afterwards. This ensures that even after the training, the back muscles are well circulated for optimal recovery. I definitely recommend the pad for sport horses, horses with stiffness, and young horses that get tense during mounting and dismounting.”

— Julia Otto - Warm-up massage roller

“Already after the first treatment with the Warm-up I could finally, after 3 years of trying everything, normally mount my horse standing complete still and without stress. I’m amazed at the difference the mounty pad has made to Jack in less than a week.”

“I am writing this review from Japan. For those who are undecided about purchasing, here are some recommended points.

?Customer Service After payment, the item was shipped immediately. It was a very good response. It only took 3 days to receive it in Japan!

?About the product The product is very well thought out, simple yet functionally designed. There are only two things I need to do to operate the massager: charge the

battery and connect the battery to the switch. I'm not good at operating machines, but this is so easy that I can't make any mistakes.

?Impressions after using it The horses were very relaxed and enjoyed their massage time. One of the horses had a bad back and struggled to move her hind legs, but after the

massage she was able to move much better.

?Lastly I am neither a veterinarian nor a physical therapist, so I cannot offer a medical or scientific opinion, but the horses that used the massager looked very relaxed and calm.

Seeing the horses looking happy makes me happy too. I am really glad that I purchased this product?”
