Cool Boots

Set Cool Boots

size M / Article no. 640-3-20-00022

Pair of cool boots for cooling horse legs.

Cooling the legs of the horse is especially important after a workout or after a long ride, because the temperature drop helps regenerate the tissue. In addition, cold therapy has an analgesic, anti-inflammatory effect and reduces swelling. The cool boots can easily be used in the box around the legs or during a step session.
The cooling boots provide a secure hold on the ball joint, the boots stay in place. The cooling pads are stored behind a thin fabric in a bag, so that the leg is protected from frostbite.

- the leg is protected from frostbite
- secure hold on the ball joint
