Transformative Whole Body Vibration Technology for Horses

Revolutionary Training and Rehabilitation for Horses:

Vitafloor presents the VME vibration floor system, a groundbreaking advancement in equine health technology. Inspired by methods used in astronaut training to enhance bone density and muscle mass, the Vitafloor VME is specifically engineered for horses, offering unmatched fitness enhancement and fat burn capabilities.

Key Health Benefits:

Muscle Growth and Recovery:

Accelerate muscle development and recovery, ideal post-intensive training.

Enhanced Blood Flow:

Promote optimal circulation, essential for horse health and vitality.

Tendon Injury Rehabilitation:

Aid in the recovery and prevention of tendon injuries, crucial for long-term equine wellness.

Compact, Durable, and Versatile:

The Vitafloor VME stands out with its sleek, compact design, measuring just 90 cm x 200 cm. It easily integrates into various spaces, making it an ideal choice for diverse training environments. Built with durable materials and featuring adjustable legs, the VME is resilient and adaptable. The water-resistant control box with variable frequency control enhances its functionality, catering to a range of training needs.

Simplicity Meets Efficiency:

The VME's simple installation process, requiring only a hard, flat surface and a standard 230 V connection, exemplifies user convenience. This straightforward approach makes it a perfect option for horse owners and trainers seeking an effective, low-maintenance solution for equine health and wellness.

A Comprehensive Tool for Training and Massage:

Not only is the Vitafloor VME effective in preventing and treating injuries, but it also serves as a versatile tool for general horse training and massage. Whether it's for intensive training recovery or regular wellness routines, the VME is your all-in-one solution.

Elevate Your Horse's Performance and Well-Being Today:

Ready to take your horse's training and rehabilitation to the next level?

Contact us to explore how the Vitafloor VME can be a game-changer in your equine care routine. Enhance your horse's health and performance effortlessly with Vitafloor.

- ✓ Made in NL
- ✓ Mobile
- ✓ Vertical vibration
- ✓ Noiseless
- ✓ Easy operation

Features

The Scientifically Proven Benefits of Vitafloor: More Than Just a Vibration Plate

Revolutionary Bone Regeneration and Enhanced Blood Circulation

Research from the Veterinary University in Davis, California, reveals that Vitafloor plays a key role in bone regeneration, not only in the legs but also in the ribs of horses. This groundbreaking system also enhances blood circulation throughout the entire body, essential for the overall health of the horse.

Tangible Vibrations for Profound Effects

Using Vitafloor, you can feel the vibrations up to the horse's shoulders, demonstrating the profound impact of this therapy. This non-invasive vibration training is the only treatment with documented positive effects on conditions such as osteoporosis and Silicosis.

Significant Improvements in Bone Density and Healing

Studies show that Vitafloor can increase bone density by as much as 20%. This is important not only for horses but also a relevant finding from human studies. Additionally, Vitafloor helps prevent and treat colic, a common problem in horses.

Accelerated Healing and Improved Hoof Health

Vitafloor offers significant benefits in treating soft tissue injuries, painful joints, laminitis, and sesamoid bone conditions. Tendon injuries typically heal in half the usual time, with a significantly better quality of the healed tissue. It also stimulates healthy and rapid hoof growth – crucial for horses with hoof problems.

Stress Reduction and Energy Consumption

Vitafloor lowers cortisol levels, contributing to the horse's relaxation. It consumes energy and burns fat, contributing to the overall fitness and health. The vibration training also increases testosterone production.

Muscle Growth and Flexibility

Preliminary veterinary research indicates that Vitafloor contributes to the growth of back muscles and increased muscle flexibility. A significant increase in muscle strength is observed after just 10 minutes on Vitafloor for a period of 10 days.

Improved Performance and Faster Recovery

Horses trained on Vitafloor show faster acceleration from a standstill and improved quality of gaits. Elasticity and flexibility increase. Additionally, Vitafloor accelerates the regeneration process after heavy exertion, allowing horses to recover more quickly.

“"Competition horses in top form" "The Vitafloor is a valuable addition to our competition horses, it really helps to keep them in top shape, clean and healthy!"”

— Steffen Peters S. Peters Dressage, San Diego CA, USA

“VERY SATISFIED WITH THE SERVICE "We have been using the Vitafloor for years. After using it, we notice a clear difference in our horses; they feel very relaxed both mentally and physically. We are also very satisfied with the service that Vitafloor provides us!"”

— Sjef Janssen | Anky Education Center | Bondscoach dressuurteam België

““I had the privilege of using a Vitafloor while stabled in Belgium in preparation for the 2014 World Equestrian Games. I was hesitant about my horse being nervous but he very quickly accepted the sessions and was soon leading himself onto the floor! Vitafloor helps keep my horses comfortable in ways that I can’t. The vibration penetrates much deeper than any icing technology or massage and treats the whole body in every session. In addition to the physical benefits, the horses love it!””

— Laura Graves, American Dressage athlete.

“"VDL stud farm is responsible for more than 50 breeding stallions worldwide. Since 1972 our warmbloods and their offspring have been put to the test at the highest levels, and our horses have been taking part in the Olympics since 1996. In addition, our stallions are being successfully used by other studbooks. In our continued quest to improve our quality, we started using a Vitafloor in the beginning of 2022 in our European certified breeding station in Bears, The Netherlands. Our company slogan is “Quality wins the battle” and the use of the Vitafloor fits within this very well”.”

— VDL Stud - Quality Always Wins

Specifications

Length	2000 mm
Width	900 mm
Height	170 mm
Weight	105 Kg
Basic material	Aluminium
Power supply	230 V / 50 Hz
Power usage	1 KW
Fuse with	16 A
Time	Not adjustable
IP rating	IP 65
Cable length	5 meter
Quality mark	CE
Power cord	230V + RA
Fixings	Included
Transport size	2100 x 1000 x 500 mm
Transport weight	140 Kg
Included	Basic control cabinet
