## Powder coating

### per meter of diameter

Powder coating / Article no. 14-1-00-00033

Powder coating is a technique in which powder is applied to the galvanized construction and is cured by means of heat so that a nice layer is created.

The coating provides a very nice finish and can be applied in any RAL colour.

The price is calculated per meter of diameter.

- ✓ Every RAL color
- ✓ Nice finish
- ✓ Durable
