

S-curve saddle pad

Saddle size 16 - 16,6 inch / 40,6 - 41,9 cm

Medium black / Article no. 810-5-02-24428

The S-Curve Pad is the latest innovation from Sedelogic that is taking the market by storm. This lightweight English half pad is suitable for all disciplines but is specially designed for horses with sensitive backs or kissing spines. It features a unique S-shaped front that provides extra shoulder freedom and utilizes patented thermoplastic inserts at the back. This advanced orthopedic saddle pad can be customized to fit your horse's back using technology developed by veterinarians, offering unparalleled therapeutic and performance benefits for your horse. For optimal shock absorption, weight distribution, and orthopedic advantages, this adjustable, custom-made saddle pad ensures the perfect fit for every horse. You can reheat and reshape the pad as often as you like when your horse's body changes (e.g., increase in muscle mass or weight) or when you switch to another horse.

- ✓ Perfect pressure distribution
- ✓ Super shock absorption
- ✓ Good ventilation
- ✓ Lightweight

Benefits of the Sedelogic S-Curve Pad:

Unparalleled pressure distribution and shock absorption. The curved front provides more shoulder freedom, enabling better and larger movements. Patented thermoplastic technology at the back provides extra support and lift. Ideal for horses with back issues and kissing spines. The three-dimensional woven structure is lightweight and highly breathable, allowing for increased airflow. This keeps the horses cooler and drier under the saddle. A saddle pad from Sedelogic is an essential accessory with numerous benefits for both your horse and yourself during riding. Here are some reasons why we highly recommend using a saddle pad:

Comfort and protection:

A saddle pad provides extra comfort and cushioning between the saddle and your horse's back. It helps reduce pressure points and absorb shocks during riding, making your horse more comfortable and less prone to injuries.

Proper fit:

A saddle pad can compensate for minor inconsistencies in the saddle fit. It can lift or fill the saddle slightly, distributing the pressure more evenly over your horse's back. This is especially useful if your horse has an irregular back shape or if the saddle doesn't fit perfectly.

Sweat absorption:

Your horse can sweat heavily during riding. A high-quality saddle pad can absorb and wick away sweat, keeping your horse's back drier. This helps prevent skin irritations and chafing, which is essential for a healthy skin.

Hygiene:

Using a saddle pad also facilitates the cleaning and maintenance of your saddle. It protects the saddle from direct contact with your horse's sweat and oils, prolonging its lifespan and reducing dirt accumulation. Additionally, the saddle pad is easy to remove and wash, ensuring you always have a clean and fresh pad.

Overall, using a saddle pad offers many benefits for the well-being and comfort of your horse, as well as the durability of your saddle. It is important to choose a high-quality saddle pad that suits your specific needs and matches the type of saddle you use.

The Sedelogic saddle pad is the first saddle blanket designed to be used under the horse's saddle, with extensive pressure measurements conducted. A team of veterinarians, technicians, a scientist from an academic hospital, and a renowned saddle maker developed this unique and performance-enhancing saddle pad using aerospace techniques. This saddle pad is suitable for all disciplines in equestrian sports, catering to both elite athletes and recreational riders.

Features

Discover the ultimate comfort and unrivaled performance of our revolutionary saddle pad. With a range of unique features, this pad provides a riding experience that you and your horse have never experienced before:

- **Excellent shock absorption:** Thanks to advanced technologies, our saddle pad offers unparalleled shock absorption. It absorbs every impact during riding, significantly reducing pressure on your horse's back. Enjoy a smoother ride and protect your horse's health.
- **Breathable structure:** Our saddle pad features a breathable structure that allows for optimal air circulation. This promotes ventilation and prevents heat and moisture buildup under the saddle. Your horse stays cooler and more comfortable, even during intense training sessions.
- **Perfect pressure distribution:** With an advanced design, our saddle pad ensures perfect pressure distribution over your horse's back. It minimizes pressure points and prevents discomfort while riding. This allows your horse to move freely and perform at its best.
- **Efficient heat dissipation:** Our saddle pad is designed to efficiently dissipate heat. The advanced material regulates temperature and prevents excessive heat buildup under the saddle. This keeps your horse cool and protected from overheating, even during long rides.
- **No pressure points:** Thanks to carefully engineered construction, our saddle pad eliminates pressure points completely. It evenly distributes the pressure across the entire surface, giving your horse full freedom of movement and unhindered performance. Prevent irritations and discomfort for a happy and healthy horse.

Experience the ultimate combination of comfort, protection, and performance with our innovative saddle pad. No more compromises when it comes to riding comfort and well-being. Choose a saddle pad that meets your highest demands and give your horse the ride it deserves.

““I have been using the Sedelologic pads for a number of years and am incredibly happy with them. From day one they have held their shape and are as good today as they were the first day I used them. They are thin enough to not affect the fit of my saddles, but have enough cushion to keep my horses backs happy.””

— Robert Mendoza- Grand Prix Show Jumper

““I’ve been riding dressage and XC schooling in the Sedelologic Pad with my horses. My feelings are that they are very light, easily worn, an exceptional fit, and as far as I can tell very effective! I’m lucky because my saddles all fit very well. The pad does not interfere with saddle fit and I think very probably that the Sedelologic pad adds to their effectiveness, especially competing in a sport where being perfect all the time is probably not possible. These pads are going to add to those tools that will make yours and your horses life easier and better”.”

— Jonty Evans

“Very grateful for this!!! We received it today and tried it out immediately, Top! We now have three different types and can use all three, We've exchanged our gel pads for the Sedelologic pads because the horses move superbly under them.”

— Marc-Peter Spahn & Ykje Baron

“Every horse is different, so every horse has his own pad for the best performances. That's only possible with Sedelologic. I train Wotan for example with the Orthopad so the saddle gets slightly lifted in the back. For him, it's the perfect solution to give his best in every competition.”

— Remco Bouwens

Specifications

Length	30°C
Width	31 cm
Thickness	18-24 mm
Drive system	500-550 gram
Maschine wasable	30°C
